

Rule Number	Existing Rule	Edited Rule (highlight changes)	Comments
1.3	Offensive or objectionable garments are not allowed on the range. Anyone wearing items deemed to be offensive or objectionable will be asked to leave the range facility. The Range Master will have final authority regarding garments deemed offensive or objectionable.	Offensive or objectionable garments are not allowed on the range. Anyone wearing items deemed to be offensive or objectionable will be asked to leave the range facility. The Range Master Match Director will have final authority regarding garments deemed offensive or objectionable.	So this aligns with USPSA Competition rules
2.4 (new)	Safety Areas are not defined in the current SCSA rules. Add section 2.4 from the USPSA Competition rules	<p>2.4 Safety Areas</p> <p>The host organization is responsible for the construction and placement of a sufficient number of Safety Areas for the match. They should be conveniently placed and easily identified with signs. At Tier II or higher matches, Safety Areas must include a table with the safe direction and boundaries clearly shown.</p> <p>2.4.1 Competitors are permitted to use the Safety Areas for the activities stated below provided they remain within the boundaries of the Safety Area and the firearm is pointed in a safe direction. Violations are subject to match disqualification (see Rules 10.3.1 & 10.3.10).</p> <p>2.4.1.1 Casing, uncasing, and holstering unloaded firearms.</p> <p>2.4.1.2 Practice the mounting, drawing, "dry-firing" and re-holstering of unloaded firearms.</p> <p>2.4.1.3 Practice the insertion and removal of empty magazines and/or to cycle the action of a firearm.</p> <p>2.4.1.4 Conduct inspections, stripping, cleaning, repairs and maintenance of firearms, component parts and other accessories.</p> <p>2.4.2 Dummy ammunition (including practice or training rounds, snap caps and empty cases), loaded magazines, loaded speed loading devices and live rounds must not be handled in a Safety Area under any circumstances (see Rule 10.3.10).</p>	A member pointed out that we don't define safety areas in SCSA and what the allowed actions are
6.7.1	Pistol Caliber Carbine Open: This is the Pistol Caliber Carbine race division. All legal Pistol Caliber Carbines, to include short-barreled rifles, are allowed. Optics and Compensators are specifically allowed, suppressors are not allowed.	Pistol Caliber Carbine Open: This is the Pistol Caliber Carbine race division. All legal Pistol Caliber Carbines, to include short-barreled rifles, are allowed. Optics and Compensators are specifically allowed, suppressors are not allowed.	Let suppressor legality be defined only in App. D8. Some were reading that suppressors were forbidden in Optics PCC and okay in Irons PCC because 6.7.2 didn't mention suppressors. App. D8 states no suppressors for PCC at all. This edit makes 6.7.1 read like the other division statements in Chapter 6
8.3.8.2	Rimfire pistol – show clear and holster or case. (Trigger need not be pulled.)	Rimfire pistol – show clear and holster or case. (Trigger need not be pulled.) RO may say "If clear, bag."	After working an Area USPSA match and all the questioning looks from rimfire shooters, why not allow 'hammer down' be omitted?
8.3.8.3	Rimfire Rifle – show clear, flag, and case. (Trigger need not be pulled.) Note: The bolt must be closed on a chamber flag.	Rimfire Rifle – show clear, flag, and case/muzzle up. (Trigger need not be pulled.) Note: The bolt must be closed on a chamber flag. RO may say "If clear, flag."	See above. Just don't know if we add to the list of commands in 8.3.8 or mention the variation in the subrules
8.5	new	Movement	
8.5.1	new	Except when the competitor is actually aiming or shooting at targets, all movement (see Appendix A3) must be accomplished with the fingers visibly outside the trigger guard and the safety should be engaged. The firearm must be pointed in a safe direction.	Added to clarify movement and finger position during Outer Limits. Copy of proposed edit of 8.5.1 in Comp Rules
10.3.7	Moving (taking more than one step) with finger inside of trigger guard.	Failure to keep the finger outside the trigger guard during movement in accordance with Section 8.5.	Basically replacing SC 10.3.7 to match Comp 10.5.10

10.3.13 (new)	NA	Failing to point the muzzle of a PCC at a side berm or back stop during casing/uncasing or removing/replacing on a conveyance or sweeping any person with the muzzle of a PCC, whether loaded or not, even if a chamber flag is inserted. Side berms/backstops may be used for casing and uncasing or removing from/placing on conveyances only. All other gun handling with the PCC, e.g., sight pictures, turning dots on/off, cleaning, dry-fire, repairs, etc. , must be accomplished in a safety area or under the direct supervision of a Range Officer. Checking if dot is on/off, removing dot cover, and turning dot on/off may be done at casing/uncasing area provided the PCC is flagged and the muzzle remains in a safe direction. The berm/backstop is not required while removing/returning a properly flagged PCC from/to a vehicle providing all other safety rules are followed.	Basically, sweeping during the COF is the only thing covered in the current rules. This was copied from the Competition rules. Copied the current proposed edit for Comp Rules
App. D3/D9 #6	Compensators permitted: RFPI/RFPO/RFRI/RFRO: Yes	Add: Suppressors are prohibited	Occasional questions about suppressors for rimfire, I guess to make it harder to pick up shots. Not in there right now because nobody thought anyone would do it.
App. D5, #18	Yes, 43 ounces with empty magazine	Yes, 45 ounces with empty magazine	So it matches Competition rules. We forgot to update SCSA.
